

JIVARA

Vibrant Water in Harmony With Nature

In partnership and collaboration to offer the highest vibration water, the Institute for Water and Environmental Improvement of Austria and The Wellness Enterprise, Inc. of the United States proudly offer the Jivara line of water structuring products.

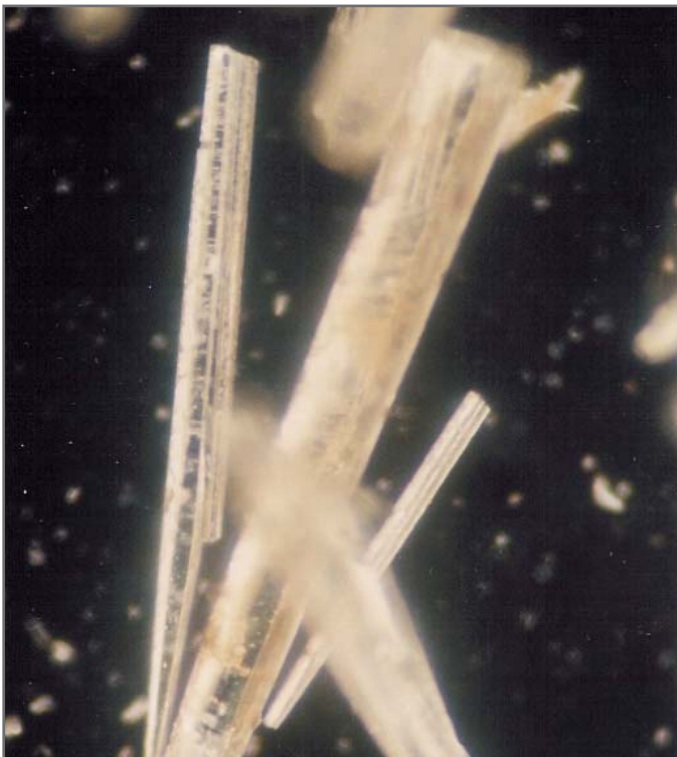

Tested and Recommended by Many Doctors and Scientists

- Holistic Water Purification
- Energized and Structured Water
- Proven Intra and Extra Cellular Hydration
- Transform the Energetics of Water with Physics
- High Quality Products Lovingly Created in Small Batches
- 20 Years Experience and Thousands of Satisfied Customers

Satisfaction Guaranteed • No Maintenance

Microscopic examinations of limescale without water purification

These sharp calcite crystals are formed when normal tap water is heated, and tend to result in massive limescale deposits.

In the human organism as well, similar calcite crystals can lead to increased hardening of the arteries in conjunction with cholesterol.

Microscopic examinations of limescale after JIVARA water purification

The limescale crystals depicted here have been transformed into aragonite in the Jivara water purification process. Thanks to the rounded shape of the crystals, there is no tendency for scale to adhere to surfaces. The sand-like residues are flushed out and existing limescale is gradually broken down.

A similar purifying effect can be seen in the human organism.
