## GARDEN/RV UNIT

### Information Sheet and Use Ideas

***Congratulations!***

***You have just received a Natural Action™ Technologies Structured Water Unit.***

The Garden / RV Unit is a wonderful structuring device designed to install in a minute at the garden faucet or to the RV. For growing amazing plants, this unit produces energized water at either the outdoor faucet or the end of the garden hose. Or, instantly fill up your motor home with delicious structured water from any questionable campground water spigot for showering, cooking, or making enjoyable beverages. Or, simply enjoy a tall, cool drink of tasty water while whisking the land whale down the highway. It's pedal to the metal with structured H2O!

### IMPORTANT

All the illustrations on this instruction sheet show typical plumbing methods. Actual installations must be adapted to individual requirements and regional codes. The author has made every effort to insure accuracy and reliability of the information and instructions. However, neither the author nor the manufacturer will accept responsibility for misinterpretation of the directions or human error.

The end user assumes complete and total responsibility for installation errors.

#### Specifications

**Weight:** Small: 1 lb.

Large: 2lb., 3 oz.

**Dimensions:**

Small: 8-1/4" L, 2.5" Dia.

Large: 17.5" L; 2.5" Dia.

**Volume:** Small: 5 oz.

☐ Small

☐ Large/RV

☐ Original

☐ Dynamically  
Enhanced

1. **Cleaning Unit:** Normal inline operation will continuously clean the unit. However, one can also clean by soaking the unit in a bath of water and apple cider vinegar, hot tap water, or running thru the dishwasher.
2. **Storing Unit:** The Garden Unit can be drained and stored in either direction, i.e., spout up or spout down, or sideways once dry.
3. **Warranty:** This unit comes with Lifetime Warranty against manufacturer defects. Misuse of the unit is not covered.

4. Avoid leaving this unit in freezing temperatures with residual water inside as impaired function may result.
5. Avoid dropping this unit as it may result in impaired function.
6. If unit is buried in dirt, any brass fittings must be covered or sealed from the dirt, as nature will break down the brass. Cover with several wraps of duct tape or other weatherproof wrap.

## INSTALLATION INSTRUCTIONS

*Note:*

- *Your unit comes pre-wrapped with white plumber's tape ready for installation. Leave this on for leak-proof operation. Some plumbing fixtures may require additional tape.*

1. The Garden Unit may be threaded easily onto a standard garden faucet and a standard garden hose.
2. Thread top (female end) of garden unit onto the faucet.
3. Thread standard garden hose to the bottom of the Garden Unit.
4. Be sure to tighten sufficiently to avoid leakage.
5. Turn on the water and ENJOY!

**Your installation is now complete! That was easy!**

## IMPORTANT ADDITIONAL NOTES

1. When using the Garden Unit for drinking water, a white, non-toxic hose is recommended. This white hose is available from camping, RV, and most hardware stores.

*Thanks for helping maintain a green earth environment.*
