

To enjoy the benefits of your AQUA ENERGIZER™, it must be installed by a licensed plumber. Installation by anyone other than a licensed plumber voids the warranty.

AQUA ENERGIZER™

Quick Connect Device

Installation Instructions

Specifications

Weight: 1 lb

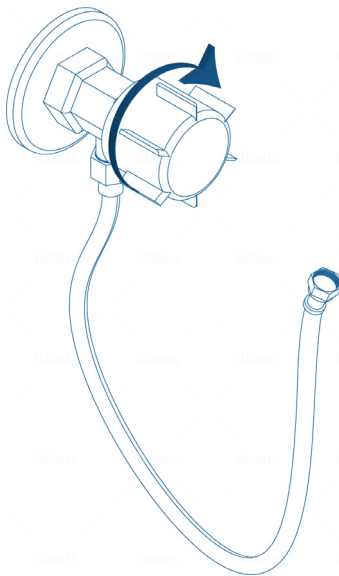

Length: 7 inches

Materials: Copper, Quartz, Minerals

Water Pressure: Approved for up to 80 psi

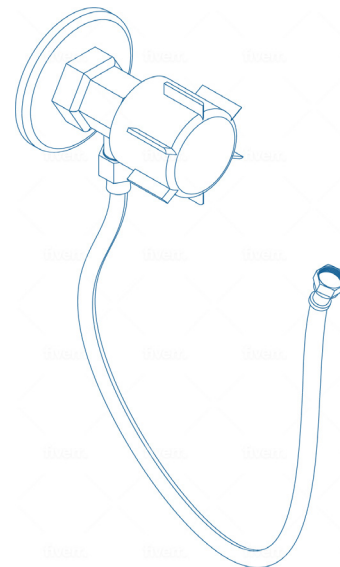

Fittings: Standard 1/4 inch Quick Connect fittings

This AQUA ENERGIZER Quick Connect is equipped with 1/4 inch push-to-connect fittings. Can easily be used with various filters, including reverse osmosis. The instructions shown are for flexible tubing installation. Your installation may vary.

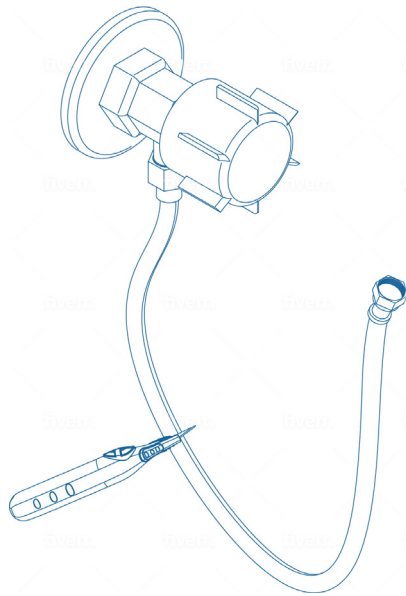

Step 1

Shut off water

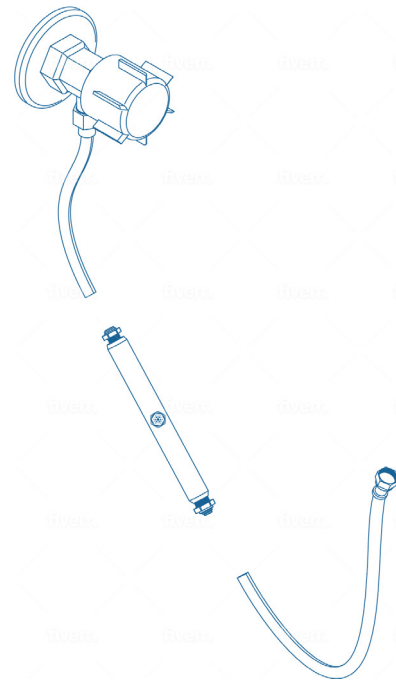

Step 2

Locate the 1/4 inch water supply line. If your water supply line is not 1/4 inch we recommend replacing the quick connects with the size that matches your supply line, e.g., 3/8 of an inch, etc.

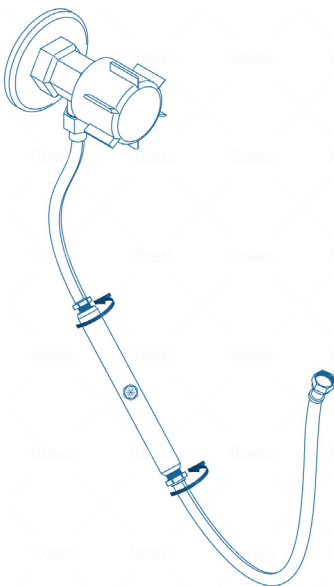

Step 3

Determine where best to 'insert' the device in the supply line. Cut the supply line with scissors or knife.

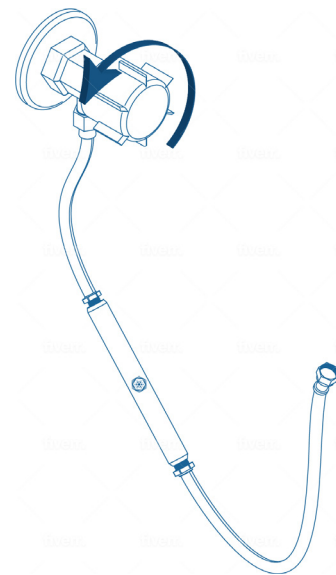

Step 4

'Attach' the AQUA ENERGIZER in between the cut tubing. Insert each end of the supply line into one end of the device. Note: the device functions with water flowing through it from either direction.

Step 5

Check to make sure connections are snug

Step 6

Turn the water back on and make sure there are no leaks.
