

The Cosmic Tower

Protection from all kinds of pathogenic radiation, building a healthy field of life energy and optimal companion for our mental and spiritual development.

The Health Dilemma of Our Time

As a result of various kinds of increasing pressure, and the increasingly lower content of life force and nutrients in our food, more and more people today are concerned with the topic of health. But because the range of therapies is so diverse, and there are an enormous number of different therapeutic devices on the market, most people find it difficult to find the one that is truly optimal for them.

Moreover, who has the time and the financial resources to regularly undergo alternative medical treatments for years on end, or to purchase various therapeutic devices themselves - which are often very expensive? And those who have effective devices often lack the time and, after the initial euphoria, also the commitment and discipline to use them optimally every day.

In addition, there is another - the most important - problem, which an expert described very aptly in the following words: "If the pathogenic radiation of all kinds that surrounds us everywhere today were visible, we wouldn't be able to see our way through the fog."

Why does radiation cause illness?

Very simply: because radiation makes the water molecules (dipoles) dance back and forth in a rhythm depending on the frequency of the radiation and, thus, can completely disrupt all the vital cluster structures in the water.

As we learn from Prof. Gerald Pollack (among others from his book: "The fourth Phase of Water"),

hexagonally structured water generates the electrons that are essential for life and, thus, for electricity. This flow, generated by structured water, is the basis of all life in the entire universe. This is why people always look for water first when they want to know whether there is life on a planet or not. And it is also exactly why all living things - plants, animals, and humans alike - always consist of water for the most part! Without water, without energy, and without the necessary light frequencies, no life!

Through the pathogenic radiation, especially all technically produced radiation, which destroys not only the healthy water structures in our bodies, but also those in all plants, as well as freshly harvested fruit and vegetables bought in the organic store, and even the water from medicinal springs, which we buy in glass bottles for health reasons. As soon as the plants are physically separated from the energy field of the earth, which is when they are harvested, or when medicinal water is withdrawn from the protective energy of the medicinal spring, they are exposed to the omnipresent disease-causing radiation and they lose more and more of their content of electrons (measurable in the form of biophoton emission) and, thus, of life energy. Today, in many foods, hardly any biophotons can be detected as early as 6-8 hours after harvest. But we humans largely live off this very energy!

It should not surprise us that we can absorb less and less life energy from fruit and vegetables from increasingly distant countries and since we eat more and more of this “energy-less” food to become satiated, we become overweight and more prone to chronic diseases.

No matter how many therapies, healthy water, energy-rich food, or the right amounts of nutritional supplements one uses to regenerate one's body, if one is permanently surrounded by disease-causing radiation fields without the proper protection, the body will continually be damaged much more severely! You will be spinning around in circles and your health will continue to go downhill, regardless of your own positive efforts.

5G Radiation alone operates in the frequency range of lethal radiation weapons (Directed Energy Weapons)! Radioactivity, microwaves, WLAN networks, geopathic load, and many other forms of radiation can be added to the list. How can one effectively protect oneself from radiation weapon systems, highly efficient mind control influences, or external control (e.g., in the case of people with microchips in their bodies) purely with vitamins or a healthy diet, when this is sometimes necessary even within minutes?

How can we neutralize the energy of all the radiation sources, cell phone transmitters, WLAN or Bluetooth networks that surround us by the thousands in a city, for example? With sometimes expensive stickers on each of these countless devices, or with energy-less “harmonization devices,” which usually work only at the frequency level, and are unable to effectively give protection against scalar waves and pathogenic, left-handed torus fields, or even extinguish radioactivity? Those who are particularly hard hit have only the alternative of moving or fleeing into the woods. But even those who move are often faced with the problem of having 5G masts installed shortly thereafter at their new residence as well - perhaps even right on their doorstep. So, fleeing helps little, because “technical progress in the form of 5G expansion” is moving at lightning speed and not everyone can afford to keep moving!

In the face of such a devastating situation, the question arises as to what one can, or should, do at all with one's limited financial resources and the negative experiences that have sometimes already been experienced many times over. **Conscious people, however, do not despair here**, because they know that everything proceeds according to a supra-ordinate, divine plan, that helpers from higher dimensions are also available to assist us and that therefore, often in seemingly hopeless situations, **unique solutions are suddenly available.**

The Cosmic Tower - an ingeniously simple, highly efficient, and all-encompassing solution

It was developed by Dipl.-Ing. Harald Thiers, the Managing Director of Chi-Balance GmbH in Bautzen. The Cosmic Tower does not bear its name purely by chance, for it builds a clockwise (right-turning) torus field, which is connected not only to the torus field of the earth, but also to that of the solar system and that of the galaxy. This is done by means of free energy, i.e., without connection to any power source. It is the torus fields that keep all the planets and suns of the universe moving and are also the key to the subject of Nikola Tesla's free energy machines. However, since this subject has been suppressed for centuries, no university in the world teaches anything about such torus fields in its curriculum or about related levitation or even about scalar waves. Only in science fiction movies is there mention of ominous “wormholes.”

Due to its unique, energetic connection and the use of various healing waters, which contain the full light spectrum including all overtone octaves, the Cosmic Tower permanently delivers the light frequencies necessary for the health of humans, animals, and plants in the entire area of operation, right up to the higher dimensions. **Energetically, it can not only help our physical bodies to dissolve blockages and become healthy, but also make the corresponding light energies available to all our subtle bodies.**

In this way, the Cosmic Tower works like a spiritual healer who is continuously on site, day in and day out, year in and year out, or like a homeopath who administers all homeopathic remedies, in all potencies, and in all required quantities, simultaneously, around the clock.

The energy field of the Cosmic Tower is capable of transforming all pathogenic radiation into healthy energy fields and, thus, fully protecting humans, animals, and the whole of nature from microwaves, electro-smog, WLAN, grid networks, smart meters, 5G radiation, negative scalar waves, radioactivity, earth radiation, water veins, mind control, or even black magic.

Due to the perfect connection with the enormous super terrestrial torus fields, for example, the Cosmic Tower CT 250 (2,5 m high) can build up a life energy field of 1000 kilometres (!) in diameter, to detoxify and regenerate large natural areas, to restore disturbed ley lines of the earth and, consequently, to raise the vibration in general.

The Cosmic Tower not only protects us from the destruction of our life energy by radiation (destruction of hexagonal water cluster structures and, therefore, electrons!), but it also supplies extra life energy to every cell in our body via the healthy life energy field it builds.

We humans can live from light and it is exactly this kind of light (in the form of the purest life energy) that the Cosmic Tower gives us!

It works like a small sun, which we can bring directly into our homes.

Other achievable effects besides the already mentioned protection against all kinds of radiation that can cause illnesses and the provision of energy for all our body cells, are:

- the removal of blockages
- significant increase in the content of negatively charged ions (i.e., electrons and, therefore, life energy) in the air
- elimination of the frequency of harmful substances (e.g., in water, food and in the air)
- energetic transformation of pathogenic, physical polluting substances
- healthy, very "thin," pleasant tasting, electron-rich water with countless light frequencies in the quality of beneficial spring water directly from any tap (without any water treatment equipment)
- healthier plants and animals
- fewer pests, increased plant growth, significantly higher crop yields
- fewer symptoms of fatigue, shorter regeneration times, and improved ability to concentrate
- markedly more efficient employees and less downtime due to illness
- harmonized energy in bedrooms and living quarters

- alignment of the chakras
- repair of gaps in aura layers
- building of a stronger protective electron layer around the entire body
- immediate support in mental-spiritual development and raising of one's own vibration (through guidance and connection of the Cosmic Tower with the higher dimensions).

The application of the Cosmic Tower is very simple: unpack, place, done! It works around the clock with no energy source ever running out. You don't have to spend extra time on any application, you save yourself countless visits to different therapists, the cost, and a lot of time.

From air pollution in the house, you will hardly notice anything. The water from the tap does not need to be treated any more. From the food that comes into the house, the frequency of harmful substances is immediately erased by the energy field that is then everywhere. The food is also immediately energized, enriched with life energy and light frequencies.

It is no longer necessary to "de-radiate" pathogenic radiation sources from numerous neighbours, e.g., through various stickers or other devices.

We also no longer need the architectural biologist who suggests moving the bed or outfitting our living room with expensive, radiation-repelling wallpaper. We do not need a radiation suit and we create in our own home or in our own business an energy field without pathogenic radiation, an energy field as in healthy nature, with all the light frequencies and those natural energies that clearly enhance our self-healing capacity and, thus, enable us to become even healthier.

The numerous Cosmic Towers already in use are all energetically connected.

Therefore, each new tower added strengthens the total energy field in North America and helps to further promote the urgently needed, energetically positive change on earth. Every lightworker can make a valuable contribution to this!

The Cosmic Towers connect to the frequency that people have at that moment. Many clients with a Cosmic Tower report a direct mental contact with their Tower, clearly feeling the powerful life energy field, and report a much deeper, very relaxed sleep, more lightness, less fear, a very close experienced guidance and finally, a feeling of being energetically very well protected against attacks of any kind.

The Cosmic Towers are available in different sizes, starting with the CT mini and ending with the CT 250 (250 cm high with an energy field of over a thousand kilometres). The energy field of a Cosmic Tower Mini will not adequately protect us from extreme radiation or even a deadly attack with a radiation weapon, nor will the CT 35, unless these devices have the energetic backing of the very large Cosmic Tower. Protection for such a situation is provided by the largest Cosmic Towers, the CT 220 or CT 250. They are also the ones who weaken the sickening, deadly energy field of 5G and other radiation, thus enabling the smaller CTs in the area to cope, provide an energy field that would normally overload them and fully perform their job of protecting people. In this regard, the interaction of as many large CTs as possible with the smaller CTs is always the basis for success. If a large CT is located in a region, owners of smaller CTs can take advantage of it.

More information about the Cosmic Tower is available:

Dipl.-Ing. Harald Thiers, a researcher and truth seeker, has been working intensively for more than 20 years on alternative health, fine material energies and in particular, with all things that usually never appear in the mass media. The impetus for this was the search for a cure for his then major health problems. Today he enjoys good health.

The first devices for protection against disease-causing radiation were developed as early as 2007.

The Cosmic Towers, with their energy fields that are now up to several thousand kilometres in size, are the culmination of this development that began then. Thanks to the support of many awakened and often selfless helping people, there is now an enormous, powerful, and very healthy life energy field that has been built up all over Central Europe.

Act now: protect plants, animals and people and even regenerate them through a healthy life energy field!

This is possible with the Cosmic Tower and its simple application: unpack it, put it down, done! No assembly, no power connection, can be moved as desired, even when on the move (e.g., in the car) fully active.

The Cosmic Tower protects you, the animals, and nature from any pathogenic radiation such as:

- microwaves
- electro-smog
- WLAN
- smart meters
- 5G radiation
- negative scalar waves
- radioactivity
- earth radiation , networks
- underground water veins
- mind control
- dark attacks

By using different types of healing water, the Cosmic Tower builds up a healthy life energy field and, thus, makes all light frequencies that are beneficial for the health of humans, animals, and plants available up to the highest super-octaves. In this way, these devices work like a 24-hour a day, year in and year out, available spiritual healer, or a perfectly functioning homeopath.

Through the continuously working energy field of the Cosmic Tower, we can achieve the following effects:

Increase of the content of negatively charged ions in the air, increase of life energy and of the functioning of the immune system, removal of blockages, elimination of the frequency of harmful substances, (i.e. in water and food), high-energy water of the quality of wholesome spring water from every tap, healthier plants and animals, fewer complications and pollution from dust in the air, fewer crop failures, better ability to concentrate, hardly any symptoms of fatigue (even after hours of driving), healthier sleep, shorter recovery times.

Available in different sizes (for apartments, houses, landscapes, companies, entire cities) from \$639

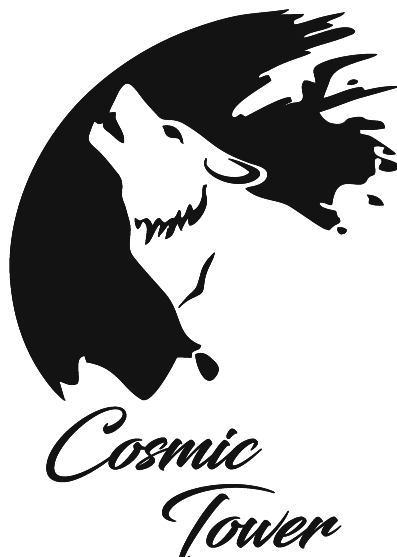

COSMIC TOWER

Model	Range / Reach	Dimensions H/W/D in inches	Weight in lbs.	Pedestal H/W/D in inches
CT Mini	25 ft. diameter, for travel	6.3 / 1.8 / 1.8	0.5	N/A
CT 35	220 yards diameter, minimal protection for a house	13.8 / 4.7 / 4.7	7	N/A
CT 75	770 - 1100 yards diameter, perfect protection for a house, 6 x stronger than the CT 35	29.5 / 5.9 / 5.9	26	1.6 / 12 / 12
CT 220	500 miles diameter	86.6 / 14.2 / 14.2	330	2.4 / 27.6 / 27.6
CT 250	620 miles diameter	98.4 / 14.2 / 14.2	342	2.4 / 27.6 / 27.6

Range specifications depend on the number and intensity of interference sources in your environment.

In order to always be on the safe side when radiation exposure continues to increase, it is advisable to choose the Cosmic Towers that have a significantly stronger energy field than "only" those devices that are energetically minimally necessary for the particular application!

"As long as man lives, he can be healed
indefinitely!"
